Below are some screen shots pertaining to the CertBlaster for A+ 220-902

The CertBlaster A+ 220-902 practice test suite include all the exam objectives seen above as well as all the Performance Based Question types you would encounter on the actual CompTIA exam. Below is the Exam vs Drill selection page. Exams 1 – 4 denote full exam simulations. The Drills are one per CompTIA Main Domain (see above) this means that all questions in a Drill belong to the same CompTIA Main Domain (exam objective) allowing you to target your studies.

When you select an exam you have a choice of one of three different test modes. In Study Mode you have the benefit of answers and explanations and feedback. In Assessment Mode you do not have access to any answers but do get feedback that offers guidance as to what you should focus on. In Certification Mode you “take the exam from the comfort of your home”, these are full exam simulations.

This is an example of a CertBlaster performance based question taken from the CertBlaster for A+ 220-902

Exam 1
1.4 Given a scenario, use appropriate Microsoft operating system features and tools.

A new disk has been added to this computer and initialized. The customer wants the new drive to have one partition Projects with the remainder of the drive dedicated to Media. Be sure to label the new drives accordingly.
